Cloud Application Development- Group 1

**Project 1: Personal Blog on IBM Cloud
Static Web Apps**

**Phase 5: Project Documentation and
Submission**

Project Summary: Personal Blog

Blog name: "vaanga suthalam"

Objective:

The goal of the "vaanga suthalam" project was to craft an enticing and user-friendly travel blog. This blog would be a hub for sharing inspiring travel narratives, captivating photographs, and valuable travel-related information. The central aim was to ensure a seamless user experience, a user-friendly navigation system, and the inclusion of a contact feature to facilitate interaction with users.

The primary objective of this project is to create an aesthetically pleasing and user-friendly travel blog named "vaanga suthalam" and host it on the IBM Static Cloud platform. "vaanga suthalam" will serve as a space for sharing compelling travel stories, mesmerizing photos, and informative travel content with the audience. The project strives to ensure a smooth and enjoyable user experience, an intuitive navigation system, and the inclusion of a contact feature to foster user engagement.

Design Thinking Process:

Empathize:

The design process commences by gaining a deep understanding of the needs and preferences of the intended audience. In this context, the audience consists of individuals passionate about travel and those in search of travel-related inspiration.

Define:

Develop an aesthetically pleasing blog that features captivating imagery and engaging travel narratives. Incorporate a seamless navigation system with a user-friendly menu bar. Additionally, include a contact option to facilitate interaction with the audience.

Ideate:

In this phase, we engage in the generation of ideas and concepts for the design and structure of the blog. This involves contemplating different design elements, including color schemes and typography. We also brainstorm ideas for the layout and structure, encompassing aspects like the home page and individual blog posts.

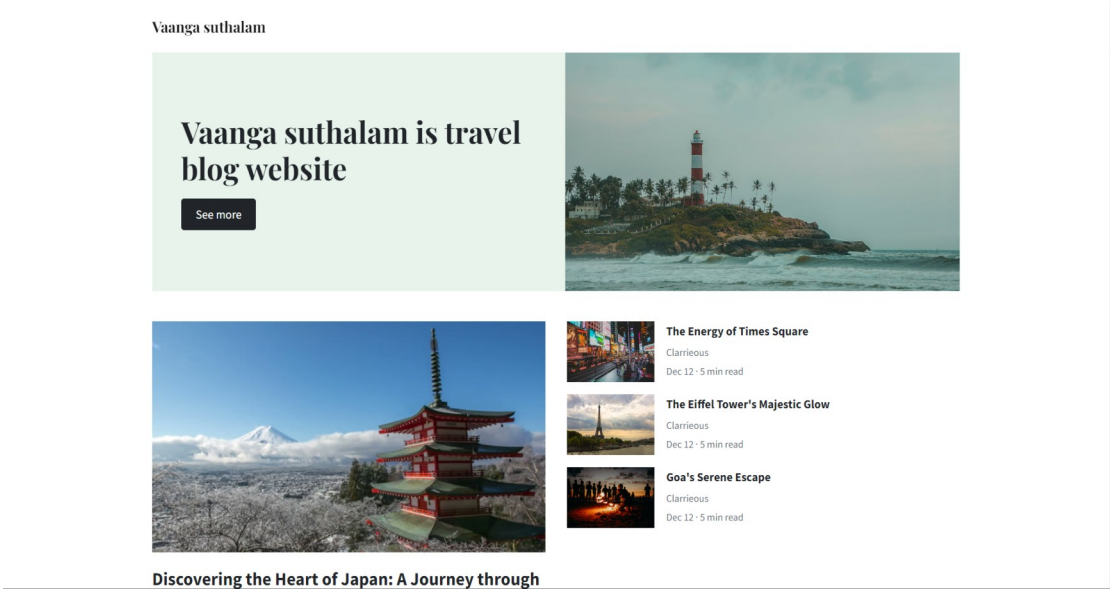

Website Structure:

The vaanga suthalam Blog website is structured with a clean and simplified layout aimed at delivering an exceptional user experience. Here's a detailed breakdown of its structure:

Homepage:

Objective: The homepage functions as the central hub, offering users an overview of the available content and straightforward navigation options to delve into blog posts.

Navigation Links: The homepage showcases prominent navigation links that direct users to individual blog posts, categorized by diverse travel destinations and experiences. This design makes it easy for users to select their desired travel story.

Individual Blog Posts:

Objective: Every blog post provides an immersive experience, sharing a distinct travel narrative, captivating photographs, and personal insights.

Content and Images: Each blog post comprises comprehensive content presented in Markdown format, facilitating effortless editing and maintenance. The adoption of Markdown also enables simple formatting, encompassing headings, lists, and embedded images, enhancing the reading experience for visitors.

Categories: Blog posts are organized into categories according to travel destinations and experiences, streamlining the process for users to discover content that matches their interests.

Contact Options:

Objective: Incorporating contact options facilitates user engagement, feedback, and communication.

Content Creation:

Blog Posts:

Objective: Content creation is the focal point of the vaanga suthalam Blog project, with the primary goal of inspiring, educating, and entertaining visitors through engaging travel narratives and experiences.

Markdown Format: Blog posts are written in Markdown format, which offers a simple method for content creation and editing. This format maintains a consistent structure while providing user-friendly features like headings, bullet lists, and hyperlinks.

Engaging Content: Every blog post is meticulously composed with captivating narratives, travel anecdotes, and personal reflections. It leverages descriptive language, vivid imagery, and storytelling techniques to transport readers to the showcased travel destinations and experiences.

High-Quality Images: Visual storytelling plays a vital role in every blog post. Carefully chosen high-quality images are integrated with the content to immerse readers in the journey. Typically, these images are sourced from the author's own travels or reputable image repositories.

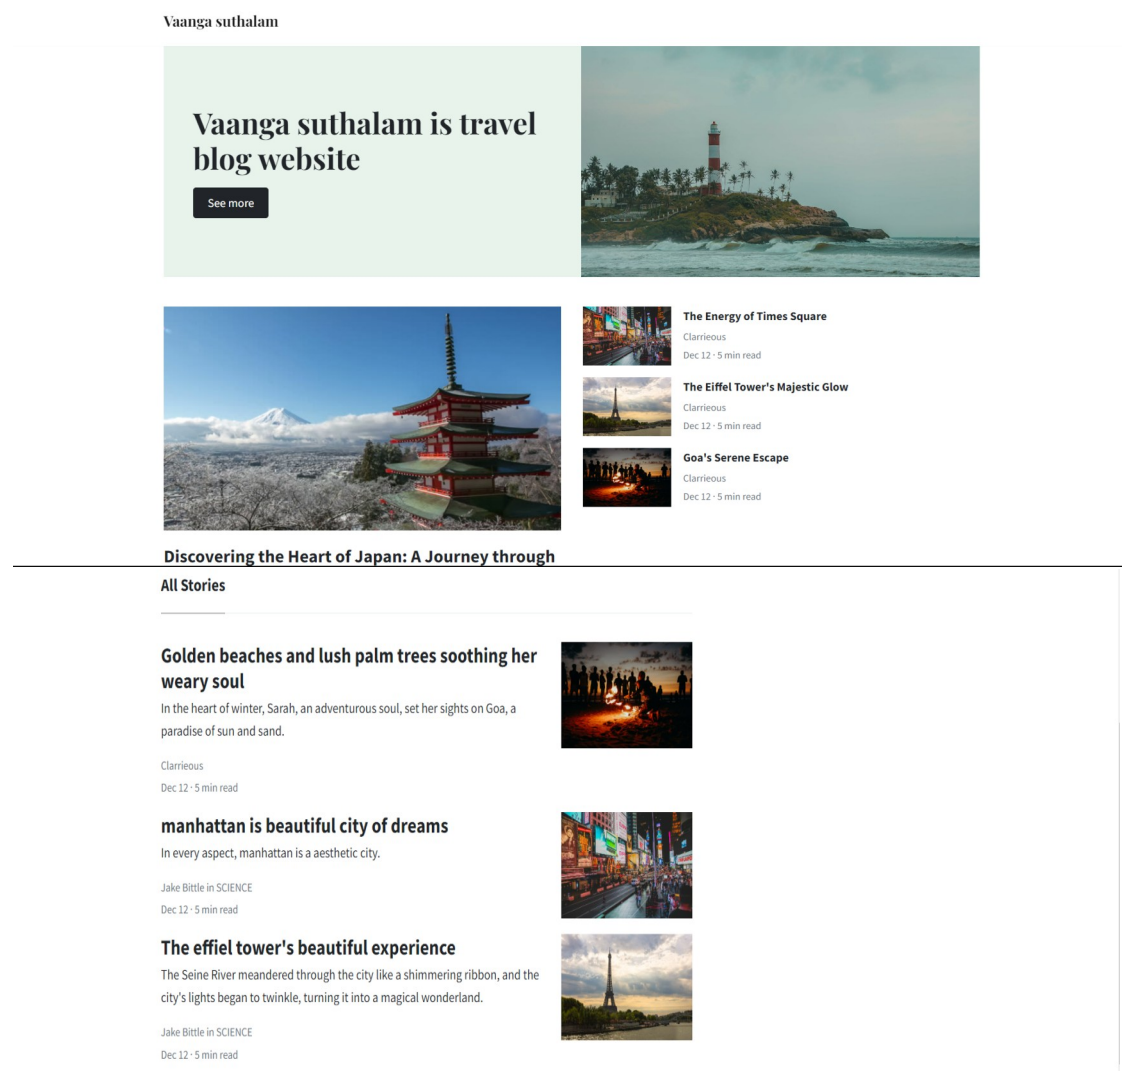

Technical Details:

The blog's foundation was constructed using HTML and CSS to establish its structure and design. An intuitive navigation system was incorporated, elevating the overall user experience. The content is editable via Markdown (.md) files, simplifying the process of updating and managing it.

Deployment:

The "vaanga suthalam" travel blog was effectively launched on the IBM Static Cloud, ensuring accessibility to a worldwide audience.
