

IBM NAANMUDHALVAN

Cloud Application Development- Group 1

Project 1:

Personal Blog on IBM Cloud Static Web Apps

Phase 3: Development Part

Introduction:

Welcome to the third phase of our project, where we delve into the creation of a static travel blog website. In this phase, our primary objectives revolve around the design and initial development of the website, achieved through the utilization of HTML and CSS. This segment of our project signifies a crucial step towards constructing a captivating and aesthetically pleasing platform for sharing remarkable travel stories and

experiences. In the following section, we will present a concise summary of the pivotal accomplishments and advancements made during this phase.

Project Objective:

In this phase, we aim to achieve the following primary goals:

1. Crafting the visual design for our travel blog website.
2. Building the static web pages through the utilization of HTML and CSS.
3. Generating captivating content enriched with stunning images and engaging travel narratives

Project Progress:

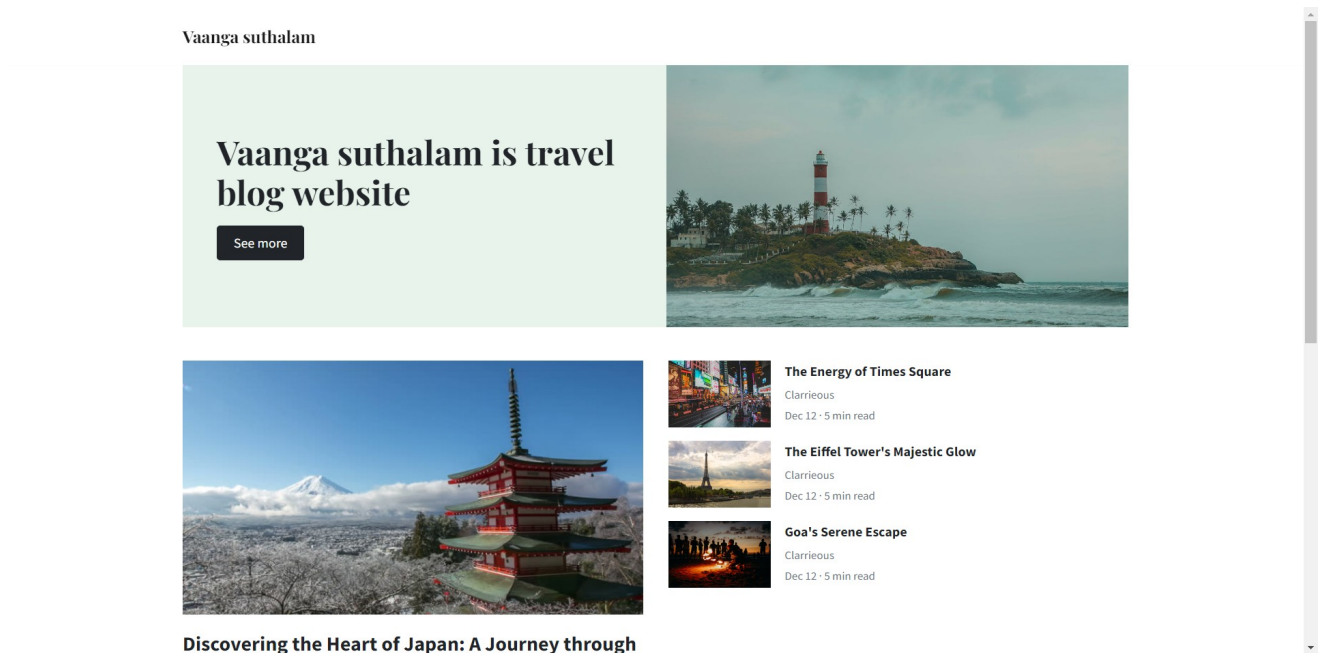

Website Layout Design:

Create a travel blog website layout that prioritizes user-friendliness and an aesthetically pleasing design.

HTML and CSS Development:

- Developed the initial webpage, establishing the fundamental framework for the project.
- Integrated a navigation bar featuring correctly functioning links for seamless transitions to various pages.

- Enhanced the visual appeal of the homepage by including an eye-catching image.

Challenges and Limitations:

Although some headway has been achieved, there are a couple of challenges and constraints that necessitate attention:

- The website remains static at present and necessitates additional development to render it fully operational.
- Continual efforts are essential to incorporate more content, encompassing travel narratives and visuals.

Next Steps:

In the forthcoming project phase, the following actions will be carried out:

- Continuing the development of additional web pages for the website.
- Enhancing the content by incorporating captivating travel narratives and high-quality images.
- Introducing interactive features or functionality as deemed necessary.

Conclusion:

The initial phase of development has been completed successfully, achieving significant progress in the design and creation of the static travel blog website. This accomplishment sets the stage for the forthcoming development stages, aimed at further enhancing the website's functionality and improving the user experience.
